Färgmarkeringar och/eller symboler för hållbara alternativ i prislistan:

Mörkgrön markering eller symbol

Miljömärkt produkt – Möbler där hela den sammansatta varan har en typ 1 miljömärkning enligt ISO 14024 med Svanen, Möbelfakta, EU Ecolabel eller annan likvärdig märkning.

Ljusgrön markering eller symbol

Hållbarhetsmärkt produkt eller beståndsdel – Möbler där hela eller delar av den sammansatta varan är hållbarhetsmärkt, exempelvis med FSC, EU Ecolabel eller OEKO-TEX®. Leverantören ska kunna ge mer detaljerad information om vilka delar eller variationer som är hållbarhetsmärka vid begäran.

Orange markering eller symbol

Klimatberäknad produkt – Produkt med dokumenterad miljövarudeklaration (EPD) enligt ISO 14025.

Lila markering eller symbol

Produkt med återvunnet eller förnybart material (enligt definitionerna i ISO 14021). Leverantören ska kunna ge information om andel (%) återvunnet och/eller förnybart (biobaserat) vid begäran. Märkning av återvinningsbart material utgår.

Blå markering eller symbol

Demonterbar produkt – Produkt som är demonterbar till olika komponenter och beståndsdelar som i första hand möjliggör återbruk och i andra hand materialåtervinning när produkten nått sin fulla livslängd. Produkten ska vara designad för renovering, det vill säga att det ska vara enkelt att reparera och byta ut moduler, komponenter och beståndsdelar som slits över tid. Exempelvis ska ytskikt, som bordsskivor, textil och stoppning kunna tas isär, avlägsnas och ersättas med hjälp av vanligt förekommande manuella verktyg, ej specialverktyg. Enklare reparationer och utbytesarbeten ska kunna utföras av en lekman. Om det krävs fackmanakunskap för mer avancerade arbeten ska det framgå av anvisningarna som leverantören ska kunna ge vid begäran. Anvisningarna ska innehålla en sprängskiss, steg för steg beskrivning inklusive vilka verktyg som krävs samt hur möbelns ingående delar bör källsorteras.

Seat covers can be made also for Rhythm and Runner upholstery. When ordering please clearly indicate the chosen option.

Gas lift with shock absorber - colour of column cover always the same as base colour.

Models Violle 130,150, 151 can be upholstered in Runner or Rhythm mesh.

Headrest may be covered in seat-upholstery or in Rhythm or Runner-mesh. Please clearly indicate on your order the chosen option.

Plastic elements: seat cover+adjustments levers, outer frame in mesh backrest, lumbar support, rear part of headrest.

Aluminium elements: armrest frame, backrest frame. It is not possible to mix different colours in particular group of elements.

In models Violle 130F / 150F gas lift with memory as standard (without height adjustment). Colour of column cover - always the same as base colour.

In models Violle 130F:

- base white and polished aluminium - cover colour lightgrey,

In models Violle 150F:

- cover colour always the same as frame of backrest.

In models with armrests:

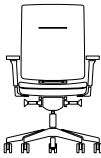

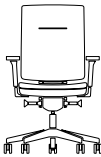

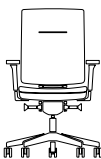

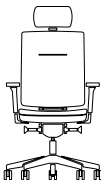

- base white and polished aluminium, armpad lightgrey - cover colour lightgrey,

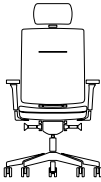

When ordering please clearly indicate the chosen option.

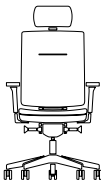

Profim XENON

- Innovative depth adjustment of the lumbar support (SmartADLS)
- Mechanisms synchro with smooth and quick adjustment of backrest spring strength
- Graphite J-bar, connecting backrest, seat and mechanism
- Available with high and low backrest, version with headrest and jacket hanger
- Available in full upholstery
- Conference version - legs or cantilever and version with or without armrest
- Blue Angel certificate - confirms that our chair is environmentally friendly
- Möbelfakta certificate - a guarantee of durability, safety, environmental care and social responsibility during the production process

Mechanisms

Synchro*

Accis^{Pro}

- A - Seat height
- B - Value of the backrest reclining force
- C - Seat side-movement function
- D - Tilt angle of the backrest and the seat / additional backrest and seat angle
- E - Seat depth

Synchro*

Action

- A - Seat height
- B - Tilt angle of the backrest and the seat
- C - Value of the backrest reclining force
- D - Seat depth
- E - Additional backrest and seat angle

Synchro*

Veris / Veris Net

- A - Seat height
- B - Tilt angle of the backrest and the seat / additional backrest and seat angle
- C - Value of the backrest reclining force
- D - Seat depth
- E - Inclination of the front part of the seat

Synchro*

Viole

- A - Seat height
- B - Tilt angle of the backrest and the seat
- C - Value of the backrest reclining force
- D - Seat depth
- E - Additional seat angle

Synchro Self*

LightUp / Motto / Xenon / Xenon Net

- A - Seat height
- B - Tilt angle of the backrest and the seat
- C - Value of the backrest reclining force
- D - Seat depth (only in STL models)

Synchro*

LightUp / Motto / Xenon / Xenon Net

- A - Seat height
- B - Tilt angle of the backrest and the seat
- C - Value of the backrest reclining force
- D - Seat depth (only in SL and SFL models)
- E - Additional backrest and seat angle (only in SFL models)

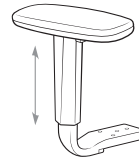

Armrests

P48

Action / Veris / Veris Net

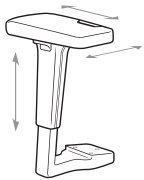

Height adjustable armrest (range 100 mm) with span adjustment (range 35 mm on each side - only in Veris and Veris Net), sliding pad (range +/- 30 mm) with pivot option (+/- 30°).
Colour of armrest frame: black.
Armpad type: PU (polyurethane pad)

P54

Veris / Veris Net

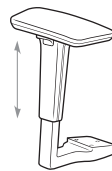

Height adjustable armrest (range 80 mm).
Colour of armrest frame: black.
Armpad type: PU (polyurethane pad)

P59

LightUp / Motto / Xenon / Xenon Net

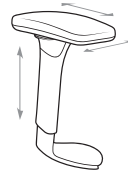

Height adjustable armrest (range 80 mm), sliding pad (+/- 50 mm) with span option (+/- 30 mm).
Colour of armrest frame: black.
Armpad type: PU (polyurethane pad)

P61

LightUp / Motto / Xenon / Xenon Net

Height adjustable armrest (range 80 mm).
Colour of armrest frame: black, light grey (only LightUp).
Armpad type: PU (polyurethane pad)

P62

Violle

Height adjustable armrest (range 90 mm), sliding pad (range +/- 50 mm) with span option (+/- 28 mm).
Colour of armrest frame: black, light grey, white, graphite, polished aluminum.
Armpad type: PU (polyurethane pad)

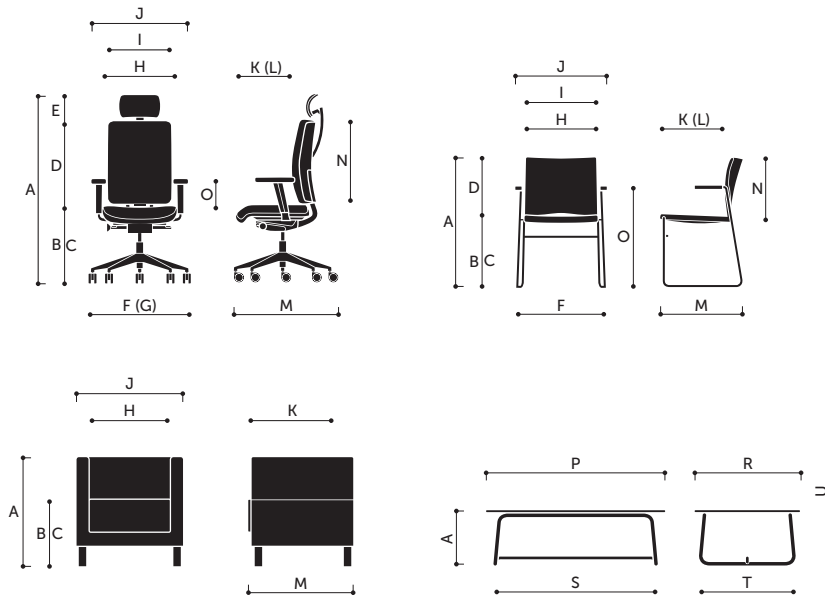

P63

Accis^{Pro}

Height adjustable armrest (range 100 mm), sliding pad (range +/- 50 mm), span option (+/- 27 mm), with pivot option (+/- 27°).
Colour of armrest frame: black, light grey.
Armpad type: PU (polyurethane pad)

Measuring methodology

Swivel armchairs and chairs are measured with a mechanism adjusted in such a way that the seat is as much as it is possible positioned levelly, while the backrest vertically. Swivel armchairs and chairs are measured on their castors, whereas visitor and reception chairs on hard glides. The measurements are approximate and can differ depending on the product configuration.

A - Total height

For products fitted with a gas lift - it is measured with gas lift's minimum and maximum extension. For products fitted with an additional backrest and headrest height adjustment - it is measured in both minimum and maximum positions of the backrest, headrest and gas lift.

B - Seat height

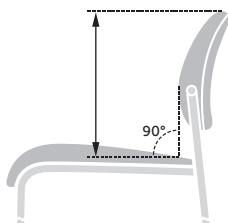

Measured at the highest point of the seat. For products fitted with a gas lift - it is measured with absorber's minimum and maximum extension.

C - Seat height with the burden

Seat measured according to EN standards (with seat burden). For products fitted with a gas lift - it is measured with gas lift's minimum and maximum extension.

D - Backrest height

Measured from the seat to the backrest upper edge. For products with adjustable backrest height - it is measured in the minimum and maximum position.

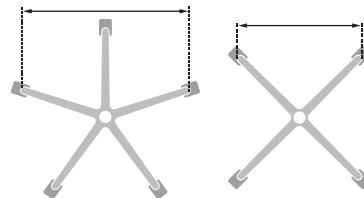

E - Headrest height

Measured from the backrest upper edge to the headrest upper edge. The headrest adjusted in maximum vertical position in relation to the upper and lower edge of the headrest. Measured in the headrest's minimum and maximum position.

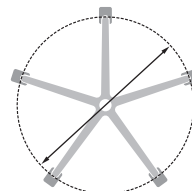

F - Base, frame width

Measured at the uttermost points of the base according to the following figures.

G - Base diameter

Measured according to the figure underneath.

H - Seat width

Measured at the uttermost points of the seat.

I - Backrest width

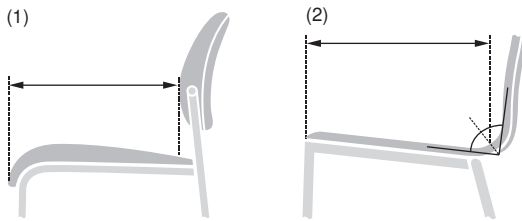

Measured at the uttermost points of the backrest.

J - Total width

Measured at the uttermost points. For products fitted with adjustable armrests - it is measured with the armrests slid apart to maximum. For products fitted with armrests with adjustable pads - it is measured with the pads slid apart to maximum.

K - Seat depth

Measuring the distance between the uttermost point on the seat and the point it touches the backrest (the contact point is determined with a level positioned vertically to the backrest by projecting the S point from the backrest onto the seat) (1). For some shell chairs, where there is no distinct border-line between the seat and the backrest, the depth is measured on the bend halfway between the seat and the backrest (2). For products with additional adjustable seat depth - it is measured with minimum and maximum slide.

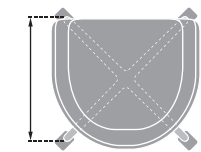

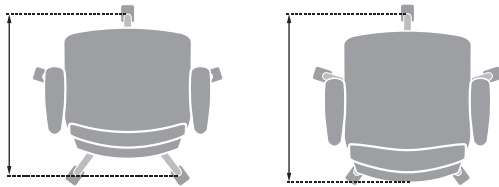

L - Seat (element) length

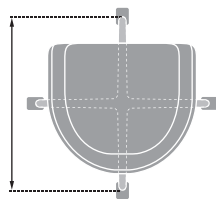

Measured at the uttermost points of the seat.

M - Total depth

Measured at the uttermost points. Swivel armchairs and chairs are measured according to the drawing underneath. For products with adjustable seat depth - it is measured with minimum and maximum slide.

In models with gas lift with memory.

In models with gas lift without memory.

N - Backrest (element) length

Measured at the uttermost points of the backrest.

O - Armrest height

For swivel armchairs and chairs – it is measured from the seat surface to the armrest upper edge. For armrests with adjustable height – it is measured in the minimum and maximum position. For visitor chairs – it is measured from the floor to the armrest upper edge.

P - Table top length

Measured at the uttermost points of the table top.

R - Table top width

Measured at the uttermost points of the table top.

S - Table frame length

Measured at the uttermost points of the table frame.

T - Table frame width

Measured at the uttermost points of the table frame.

U - Table top thickness

Table top (element) thickness is measured.

- light fastness - >5 (DIN EN ISO 105-B02)
- bacterial resistance (AATCC 147)
- mildew resistance (ASTM G21-02)
- urine resistance
- antistatic (ASTM D-257)

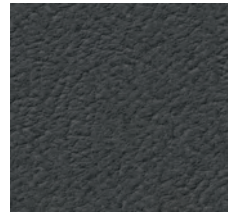

PERMABLOK3® is a proven vinyl protective coating that's engineered to create a tough, effective barrier against the three biggest problems encountered in healthcare and hospitality environments – germs, abrasion, and stains. You can't see it or feel it, yet the protection it offers results in extended performance and lasting beauty with a minimum of care.

Certain clothing and accessory dyes (such as those used on denim jeans) may migrate to lighter colors. This phenomenon is increased by humidity and temperature and is irreversible.

The producer will not assume responsibility for dye transfer caused by external contaminants and possible permanent staining caused by this phenomenon.

Synergy

III price group

Composition

95% wool
5% polyamide

Weight

400 g/m²

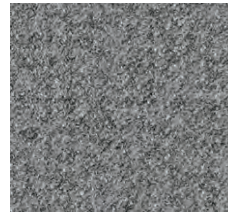

Certificates

- abrasion resistance - 100000 Martindale cycles (BS-EN ISO 12947-2)
- pilling resistance - 4 (BS-EN ISO 12945-2)
- flammability - cigarette (BS-EN 1021-1)
- flammability - match (BS-EN 1021-2)
- flammability (UNI 9175 Class 11M)
- light fastness - 5 (ISO 105-B02)

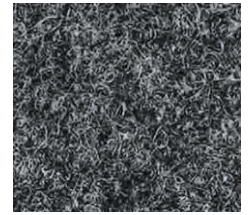

Because of the fact that the fabric Synergy is composed of 95% natural fiber, each of the batches shows variations in shade, which may be visible in products of follow-up orders. Additionally, an inherent feature of all natural fibers is the tendency to delicate fabric pilling.
