Elsäkerhet - för din trygghet

Elsäkerhet är en av de viktigaste beståndsdelarna i vårt jobb att utveckla lampor. Vi ställer höga krav på oss själva att ta fram säkra och bra produkter som lever upp till alla lagar och regler i hela Europa. Redan i produktutvecklingsfasen är vi noga med att välja bara godkända elkomponenter, med korrekta godkännanden och märkning. Vi lägger ner mycket tid och möda på att konstruera våra lampor rätt redan på ritbordet.

För att Du ska känna dig trygg låter vi ett oberoende test-laboratorium testa våra lampor mot gällande standard. Här följer en förteckning över de vanligaste symbolerna som du kan hitta på våra lampor:

CE

Tillverkaren försäkrar att produkten uppfyller EUs allmänna säkerhetskrav.

S

Produkten är testad av oberoende part och uppfyller säkerhetskrav enligt Europeisk standard.

Klass 1

Skydd mot elchock utgörs av skyddsjordning. OBS! Armatyren måste anslutas till jordat uttag.

Klass 2

Skydd mot elchock utgörs av två lager isolering.

Klass 3

Skydd mot elchock utgörs av att armaturen drivs med klenspanning, det vill säga spänningen är så låg att den inte utgör någon elektrisk fara.

Soptunnan

Skall ej slängas i hushållssoporna.

Avståndssymbolen

Minsta säkerhetsavstånd till belyst föremål.
