

PIECE TABLE

All tables have legs, but few have as much attitude as Piece.

The 730, 900 and 1060 mm heights facilitate a wide range of working situations.

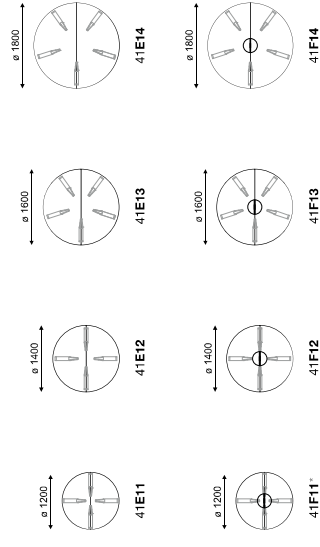

From sitting work to sitting or standing meetings. Planned or spontaneous. Strict or creative.

For computer work, the Piece table is available with cable holes and cable trays to manage all of that unsightly but necessary cabling. Choose between round and rectangular Piece tables. The latter can be made into as long a table as you require.

Another smart accessory is our new Piece Serve, a recessed holder that you can place right in the middle of the table. Use it as a storage tray by day, as an ice bucket for your evening celebration or even as a planter for fresh herbs that can add that finishing touch to your lunch hour.
